

CIFIAL

A legacy in the art of know-how

the products

Designed for the UK, many low pressure options. Products are clearly marked HP, MP, or LP depending on recommended operating water pressure

10
YEAR
guarantee

A 10 year guarantee is extended on our tap ranges when installed in a residential application.
* does not cover wear and tear parts

Products manufactured at our own factories in Portugal using solid lead free brass to ensure the highest quality.

Rub clean aerators are used in many of our basin taps. These have many advantages which include:
* maximum lime resistance
* no need to disassemble the aerator for cleaning
* low noise level
* damage proof

terms

All goods are sold through displaying stockists. For full terms and conditions contact our sales office. With continuing product development and design we reserve the right to change specification without prior notice

**Prices are suggested retail
Including VAT @ 20%**

‘past &
present’
the endeavour
for quality to
stay the same

Cifial have embraced new technology during our 114 years of existence and have invested in research and development which has enabled us to evolve from being a local producer to a global supplier

As a manufacturer Cifial have learnt to adapt to the fast and deep changes in the market which require constant remodeling of strategies to enable the company to stay ahead. By taking on challenges and incorporating the latest technology within the production methods to produce quality pieces at competitive prices.

water saving technology

' Our products are fitted with flow regulators as standard to ensure the optimisation of water '

Cifial have used their expertise in product development and have focused on the environment. Our shower heads have been designed to deliver maximum performance with the least water usage, in fact most of our showers only use 9 litres a minute.

water efficiency

Basin taps:
Where marked will be limited to 5 litres per minute on a high pressure system. This works out as an average daily usage of 9.48 litres a day. For all other basin mixers please consult with the sales office where we can offer other solutions on flow restriction.

Shower heads:
Where marked our showers will be limited to a maximum of 9 litres per minute, therefore having a 4 minute shower you would use 36 litres a day. Please note that some large shower heads require a high flow rate.

Awards

Technology

Cifial develop products in house. We have our own design team who ensure that all processes throughout the factory are vigorously tested and perform to their maximum efficiency. Our laboratories test the raw materials to the finest detail and all subsequent processes to ensure that the end product gives you years of trouble free use.

our organization

Our production capabilities and innovation have secured us many projects worldwide ranging from copper taps in a boutique hotel to 1500 pieces of ceramics in an apartment development. From luxury spa retreats to highly successful hotels such as the Pestana Hotel in London.

 Clear

These shower heads have been designed to give you all the benefit of chromotherapy - with 2 set programs designed to either relax or energise your well being. The remote control can also be used to set any one of the 9 colours to run constantly to enhance your showering experience. The set program colour sequence lasts 4 minutes and a Solid colour runs for 10 minutes. These can both be re-set at a touch of a button

Special PVD finishes:

Cifial have used the very latest PVD technology on the finish of some of their kitchen taps. PVD is a highly resistant finish and is perfect for the harsh kitchen environment.

Some contemporary models are available in X20 PVD Brushed Nickel, whilst some traditional models are available in 721 PVD Polished Nickel.

PVD ensures many years of high quality finish

3 control thermostatic shower valve - 2 outlets

LP

Top Control = on/off valve
 Bottom Control = on/off valve
 Middle Control = thermostat with temperature override

BAR	FLOW RATES	
	top outlet	bottom outlet
0.2	11.3	11.3
0.5	17.8	17.8
1	25.5	25.5
1.5	31.3	31.3
2	37	37
3	47	47

NB. When both top & bottom valves are operating at the same time this will affect the flow rate.
 Bottom outlet runs at slightly higher temperature than top valve.

3 control landscape shower valve - 2 outlets

LP

Left Control = on/off valve
 Right Control = on/off valve
 Middle Control = thermostat with temperature override

BAR	FLOW RATES	
	left outlet	right outlet
0.2	11.3	11.3
0.5	17.8	17.8
1	25.5	25.5
1.5	31.3	31.3
2	37	37
3	47	47

NB. When both left & right valves are operating at the same time this will affect the flow rate.
 Right outlet runs at slightly higher temperature than left valve.

2 outlets

Certifications

ISO 9001

Quality Management System Certification

The ISO 9001 registration assures the company's commitment to quality in its operations, customer service and product delivery

Cifial Ceramics

CIFIAL - Industria Ceramics S.A is registered under NP EN ISO 9001 standard

Cifial sanitaryware is produced according to legal specifications from the European Union directives.

Cifial Taps

CIFIAL - Torneiras S.A is registered under NP EN ISO 9001 standard

Guarantee

Finishes:

Polished Chrome - A ten year guarantee is extended on all bathroom and kitchen products with Cifial UK's chrome plate finish when installed in a residential application

Special finishes (including Matt Black) - A one year guarantee is extended on all bathroom products with Cifial UK's special finishes when installed in a residential application. All special finishes are non returnable,

General Cleaning - We recommend that Cifial products are cleaned using a **soft damp cloth**, we strongly advise against using any cleaning products, either powders or liquids, as they may contain harmful chemicals which could damage the product.

Taps & Shower Fittings:

A ten year guarantee is extended on all components to be free from failure due to defects in material and workmanship when installed in a residential application **(excludes wear and tear parts - see below)**

The removal of flow restrictors in shower heads voids the guarantee.

Wear and tear parts:

A one year guarantee is extended on all wear and tear parts including sealants, waste clickers, membranes, all cartridges, diverters, flexible hoses and electronic components.

Shower maintenance:

The shower valve thermostatic cartridge especially in hard water areas should be removed and cleaned regularly, and the thermostatic control handle moved between maximum and minimum limits in accordance with our installation instructions to prevent the build up of limescale incrustation which could block up the thermostatic cartridge. See website for Care & Maintenance Guide:
<http://www.cifial.co.uk/showers/care.PDF>

Shower heads nozzles need to be regularly 'rubbed' to prevent the build up of limescale.

Ceramics guarantee:

A one year guarantee is extended on all ceramic sanitaryware.

Exclusions:

The following are not covered by our warranty:

- damage incurred by daily use, product misuse or inadequate installation
- damage to the surface caused by improper cleaning or spills of chemical products
- damaged products due to the poor quality of water (i.e. hard water, or water with impurities, or chemical substances)
- damage caused by frost

Dimensions:

For all technical details please visit our website www.cifial.co.uk

Technological Finishes

Cifial are masters in technological finishes and can produce finishes that are more resistant to scratches and keep their brightness for much longer by a process called PVD.

PVD stands for Physical Vapour Deposition - it is the highest quality in decorative coatings and is obtained by a physical vapour deposition of Zirconium, Titanium or other material. This finish increases the hardness and abrasion resistance. The hardness achieved is higher than 2500 Vickers and compared to the traditional electrolytic finishes, PVD increases to more than double the resistance time in the corrosion tests (Corrodokote, Aceptic Salt Spray and Cass Test). The excellent characteristics of this finish result in same colour and brightness for life, high resistance to oxidation by atmospheric agents, higher hardness that result on an excellent wear resistance.

We offer PVD for hotel projects and large developments.

Our finishes spectrum include:

10
YEAR
guarantee

	Polished	Brushed	Satin
Nickel	✓	✓	✓
Rose Gold	✓	✓	✓
Anthracite	✓	✓	✓
Copper	✓	✓	✓
Gold	✓	✓	✓

and many more.

The PVD finishes are not associated to any particular product line. Availability, prices and delivery must be confirmed.

Finishes

Cifal offer the highest quality electrolytic plating which are hand finished. With appropriate care and maintenance, CIFIAl products keep their original appearance for many years. In order to maintain their original surface finish you just need to follow some simple recommendations:

- * Always dry with soft cloth after use.
- * Rinse regularly with water and dry with a soft cloth
- * Never use abrasive cleaning products containing hydrochloric acid, bleach or other inappropriate chemicals, including abrasive scouring pads.
- * Extra care should be taken if you live in a hard water area. Should limescale build-up appear please clean with vinegar and rinse thoroughly with water. Dry with a soft cloth.
- * Extra care should also be taken when using personal toiletries such as toothpaste, shower gels, soaps, etc as these can leave residue that may cause blemishes. Always make sure surfaces are rinsed thoroughly with water and dry with a soft cloth.
- * For satin metal surfaces apply a little vaseline or wax to help maintain the brightness.
