DESIGN, QUALITY & SERVICE

Welcome to your new LED bathroom lighting brochure from all of us at Sensio.

We realise the importance of the project you have undertaken and we are here to make sure you get the bathroom of your dreams. As a family-owned business our focus and commitment to delivering the best quality products, conceived by our in-house team of passionate 'designers', is unparalleled.

Don't just take our word for it - here are just a selection of the awards we have won for our product design excellence:

HOUSE BEAUTIFUL
BEST LIGHTING
SILVER AWARD
2016

INNOVATION AWARDS
EXCEL LONDON 2011

Whichever of our products you choose, we want you to know you are in safe hands with Sensio.

THE CHOICE IS YOURS

Planning your bathroom carefully is essential in creating a space that represents you. Choose products with features that really inspire you.

We are passionate about what we do as shown through the innovative and cutting-edge designs that are featured throughout this brochure.

- 1 | Diffused lights can provide a stunning effect in your bathroom. We recommend this finish for modern bathroom styles.
- 2 | Clever cabinet lighting can provide useful benefits when trying to access those hard to reach places.
- 3 | We have added demister technology to many of our mirrors. You no longer need to wait for the steam to clear in your bathroom before it becomes usable.

Keep a look out for these features...

Product feature icons are used on each product page to give you a quick overview. Here's a key for the icons we've used:

- 
Bluetooth™
 Look out for our mirrors that feature audio Bluetooth™ technology, meaning that you can play your favourite music or listen to the radio via Bluetooth™ connectivity in the bathroom.
- 
Demister Pad
 Many of our mirrors contain demister pads, which gently heat the surface of the mirror to keep it clear in steam filled bathrooms.
- 
Touch Sensor
 Some of our mirrors feature a smart touch sensor that allows you to easily switch your lights on and off with one simple touch.
- 
Infrared Sensor
 Some of our mirrors feature an infrared sensor meaning the lights can be switched on and off with the swipe of a hand - no touch needed.
- 
PIR Sensor
 Lights including this feature are activated by motion.
- 
Shaver Socket
 Look out for mirrors that have a pre-installed shaver socket. These are hidden away discretely in some of our mirrors and are suitable for electric shavers and toothbrushes.
- 
Rotation Ready
 Some of our mirrors are rotatable, meaning that you can hang them either landscape or portrait.
- 
IP Rated
 All of our products comply with electrical equipment (safety) regulations and each of our bathroom products have been given an appropriate IP rating which is clearly stated on each page. See page 99.
- 
Zones
 The IEE Wiring Regulations (17th Edition) have identified bathroom zones to indicate what type of electrical equipment can be installed. Each page states the zone that the product is safe for use in. See page 98.
- 
Voltage
 Any product with a 240V icon is a mains powered product and does not require an LED driver. We also offer low voltage products listed as 350mA or 24V, for these please ensure you order the driver listed on the product page.
- 
Fire Rated
 Our fire rated ceiling lights have intumescent properties that restore the fire integrity of the ceiling area surrounding any cut out.
- 
Retrofit Products
 These products are simple to install as they require no electrical installation, making them ideal for adding to your bathroom design after its completion.
- 
Colour Temperature
 Each item carries one of the following colour temperature ratings:
 -  CCT
 -  Cool
 -  Warm
 -  Cool/Warm
 -  Natural
- 
COB LED Lighting
 COB (Chip on Board) is one of the very latest LED technologies. COB products feature multiple small LED chips packed together to form one lighting module. Benefits include enhanced efficiency, higher light output, longer lifespan and no visible LED diodes.
- 
Lamp Life
 The long life expectancy of our lights is listed in hours on this icon.
- 
Beam Angle
 It is important to note the direction and angle light will be emitted when creating your lighting plan.
- 
Dimmable
 Some of our products have a dimmer function. (Please note these items are only compatible with Sensio dimmer drivers and switches).
- 
Battery Operated
 If you want a quick and easy installation avoiding wires and electrics, look out for battery operated range of products.
- 
Rechargeable
 Some lights are fitted with a USB charging point (chargers sold separately).
- 
Remote Controlled
 Take control of your lights without having to touch them (remotes sold separately).
- 
Speakers
 Discreetly fitted speakers in our range of bathroom mirrors will add a new dimension to your bathroom.

WARM WHITE OR COOL WHITE?

Have you ever wondered what the differences between warm white and cool white colour temperatures are?

When LEDs (light-emitting diodes) were initially launched into the market, they emitted an almost blue colour which failed to convince many people of their suitability as a solution to their domestic lighting requirements.

As technology has advanced, LEDs have become the most energy efficient lighting option and the standard choice throughout the market. They have also gained popularity through their cool and warm colour options.

Typically LEDs are available as cool or warm, but what does this mean and which should you choose?

We use a measure called the Kelvin scale (K) to determine the temperature output of our lights.

Anything between 2500K - 3000K is considered warm, while anything between 4500K - 6500K emits a cooler temperature.

Warm white, as the title suggests provides an orange or yellow tone. Used throughout the house in most rooms, warm works particularly well with light colours and timber finishes.

Cool white produces a much brighter light and offers a modern look. Cool shades combine well with bold or minimal themes.

Correlated Colour Temperature (CCT) is a new concept that provides seamless transition from warm to cool white temperatures.

Our range of CCT products enables the user to cycle through the full spectrum of temperatures between cool and natural light, then from natural to warm light. This allows the customer to mimic outside lighting conditions with much greater accuracy - a feature that has been scientifically proven to have a positive impact on our health.

LED ILLUMINATED MIRRORS

A mirror is an essential element in any bathroom as it is integral to the daily routine. Incorporate an illuminated mirror to provide the perfect lighting when getting ready in the morning whilst also making a design statement. Here at Sensio we offer an extensive range of illuminated LED mirrors in various styles and with a wealth of integrated features. Whatever your needs, our collection is guaranteed to meet them. Choose from the latest features including touch sensors, colour changing LED technology and even enjoy your favourite music with our range of Audio Bluetooth™ mirrors. All of our illuminated mirrors are IP44 rated and really do have a beauty of their own that can truly reflect your individual style and enhance any bathroom design.

Our tips and advice...

See clearly

We know how frustrating it can be to suffer condensation on your bathroom mirror, after all it's the little things in life that matter. Our demister technology ensures that your new mirror remains clear under all conditions. Look out for the demister icon, indicating which mirrors feature this innovative and practical solution.

Diffused... or not?

When choosing your new bathroom mirror you need to decide upon your preferred type of lighting. Many of our mirrors feature diffused lighting; a popular approach which spreads luminosity evenly whilst hiding individual LEDs. Refer to the technical pages 38-43, 54-55 for details of mirrors that feature diffused lighting.

Did you know..?

All Sensio bathroom mirrors are IP44-rated, meaning they can be used within 60cm of the water outlet on your sink. This enables you to confidently fit our mirrors within 'zone 2' of your bathroom. (Always ensure any electrical products used in your bathroom are given an IP44 rating). For more information on IP ratings and zones please refer to page 98-99.

SE30771C0 | DESTINY

Destiny

“Hollywood glamour”

Always wanted to inject some Hollywood styling into your home? Now you can with the eye catching Destiny mirror. A-list features include integrated demister technology and a dimmable lighting function. Featuring both warm and cool lighting temperatures you can be sure to feel ready for the silver screen every time you leave the house.

Destiny is 700 x 500 x 35mm.

Please see **page 38** for technical details.

SE30771C0 | DESTINY

Grace

“Our popular Grace family of mirrors will wow and delight in equal measure”

Now boasting three sizes, Grace includes an infrared sensor switch which activates the diffused strip of light running around the mirror. The integrated demister pad clears condensation from the central area. This contemporary mirror features a soft edge profile creating a finish that is subtle but beautiful.

The Grace is now available in three sizes: 800 x 600 x 50/35mm and 700 x 500 x 55mm.

800 x 600 x 50mm

SE30778CO | GRACE

800 x 600 x 35mm

SE30676CO | GRACE

700 x 500 x 55mm

SE30777CO | GRACE

Reagan

“Mood enhancing”

Simple, yet striking. The Reagan provides you with easy to use functions such as the touch sensor activation and demister pad.

The equal light distribution is perfect for shadow reduction, ensuring you always look your best.

Reagan is available in one size; 800 x 600 x 60mm.

SE30772C0 | REAGAN

Bronte

“Lightweight design”

The thin and understated design lends itself to minimally designed bathrooms. The demister pad conveniently runs the full width of the mirror for added visibility. The mirror is brought to life with the swipe of a hand using the sensor switch.

Bronte is 800 x 600 x 30mm.

SE30576C01 | BRONTE

SE307790CO | Shannon

Shannon

“Ultimate modern living”

This beautifully crafted mirror with its sleek design and soft edges offers the ultimate modern living. 130 diffused LEDs provide super lighting coverage while the demister pad keeps the mirror crystal clear.

Shannon is 700 x 500 x 55mm.

Kai

“Cover all of your needs with the Kai”

With a stylish design incorporating two rows of 30 cool LEDs, the Kai generates an eye catching glow in your bathroom.

Featuring an integrated infra-red sensor for light activation as well as a demister pad and a charger socket for toothbrushes and shavers.

Kai is 700 x 500 x 30mm.

SE30696C01 | KAI

Serenity

“Lighting to match your mood”

Featuring colour changing technology, this stunning backlit mirror exudes character to match your mood. Featuring a touch sensor makes light activation easier while the flexible style makes it a perfect addition to any bathroom.

Serenity is 700 x 500 x 40mm

SE30716D0 | SERENITY

Apollo

“Out of this world”

The Apollo provides an interstellar experience. Activated by the swipe of a hand with an infra-red sensor, the Apollo features integrated bluetooth connectivity to play your favourite music. Packed full of features, this stylish and contemporary mirror will transport you to the stars.

Apollo is 600 x 500 x 50mm.

SE30656C0 | Apollo

Ester

“Sophisticated and slimline”

This show-stopping mirror complements any bathroom style with its sleek and slimline profile.

The slimline Ester is 500 x 390 x 30mm.

SE30456C0 | ESTER

Tula

“Simple design with a stunning effect”

Tula is 600 x 500 x 30mm.

SE30486C0 | TULA

Skye

“Elegance with optimum light output”

Skye is 600 x 500 x 50mm.

SE30536C0 | SKYE

Nyla

“Perfect for adding a little extra storage space”

Nyla is 600 x 500 x 45mm.

SE30566C0.1 | NYLA

Ventura

“Never has practicality looked so good”

The Ventura mirror provides a wealth of functions designed to help your morning routine. The light is cleverly distributed equally on either side of the mirror to reduce shadowing effects.

Ventura is 700 x 500 x 35mm.

SE30864CO | VENTURA

SE30817CO | MISTRAL

Mistral

“Unique style combines with modern practicality”

The eye catching Mistral offers something a little different. The precise curvature and shallow depth creates a unique floating effect once fitted to the wall. Expertly crafted to allow for either landscape or portrait orientation.

Mistral is 800 x 500 x 30mm.

Glimmer

“Show-stopping design”

The fashionable Glimmer has proven so popular we have had to release it in three sizes. Featuring a stunning diffused border lit by an integrated infrared sensor, this really is a show-stopper that will bring a smile to your face every time you use it.

600 x 500 x 40mm

SE30726CO | GLIMMER

600 x 900 x 40mm

SE30736CO | GLIMMER

600 x 1200 x 40mm

SE30746CO | GLIMMER

Sienna

“Compact mirror with a lot packed in”

This reduced sized mirror is perfect for smaller bathrooms. Still boasting over 24 LEDs on both sides, the Sienna doesn't compromise on quality and output.

Packed full of features including a demister pad, shaver socket and an integrated infra-red sensor for light activation.

Sienna is 500 x 390 x 50mm.

SE30556CO | SIENNA

Eden

“Add depth with this sleek backlit mirror”

The Eden mirror features a touch sensor which instantly activates the backlit ambient lighting surround.

An additional feature is the demister pad which provides clear visibility in damp conditions.

The slightly larger width of 900mm means this mirror is more suitable for larger bathroom designs.

Eden is 600 x 900 x 40mm.

SE30756CO | EDEN

Battery Operated Mirrors

If you are looking for an LED mirror that is easy to install, our superb selection of battery operated mirrors provide the perfect solution. They are packed full of features too - see which model would be the perfect fit for you.

Isla

“Easy installation”

Isla is 500 x 390 x 30mm.

SE30466CO | ISLA

Gina

“Hassle free”

Gina is 700 x 500 x 35mm.

SE30607CO | GINA

Ava

“No wiring required”

Ava is 700 x 500 x 30mm.

SE30506CO.1 | AVA

Aria

“Elegant and stylish”

Aria is Ø 500 x 30mm.

SE30781CO | ARIA

Luna

“Atmospheric lighting”

Luna is Ø 600 x 30mm.

SE30783CO | LUNA

Como

“Spa-like luxury”

Our collection of rounded mirrors feature beautiful and meticulous curvature, boasting various features that will add a touch of luxury to your bathroom and generate a feeling of restful relaxation.

This range is available in three styles, for features and benefits of each mirror please see page 42

Como is Ø 600 x 30mm.

SE30782CO | COMO

Orla

“Stunning centre piece with innovative features”

Orla is Ø 500 x 40mm.

SE30516CO | ORLA

Portland

“Simple doesn’t mean ordinary”

The Portland mirror exudes charm with its simple design. The bevelled edge offers a hint of complexity to an otherwise perfect appearance.

Add character by combining with our over mirror lighting (see page 64 for more details).

SE30004TPO | PORTLAND | £64.99

Rockford

“Layered beauty”

Every time you look into the Rockford mirror, the dual layered design offers a beautiful framed reflection.

We recommend combining the Rockford with over/side mirror lighting (see page 64 for more details).

SE30104TPO | ROCKFORD | £69.00

LED ILLUMINATED MIRROR CABINETS

Our range of mirror cabinets offer the perfect "hidden" space to help you utilize space effectively whilst complimenting the design and overall feel of your bathroom. Available in a variety of sizes and boasting a wealth of features, our cabinets combine effortlessly with any bathroom style.

Our tips and advice...

Create space

Reduce the crowding of products around your sink. Our cabinets feature either two or three glass shelves, ensuring your bathroom remains a clutter free space and providing a perfect complement to the design and feel of the room. Refer to the technical pages (54-55) for more details of shelving for each mirror cabinet.

Reflect your surroundings

Most of our cabinets feature mirrored side panels which help accentuate the colours and materials used in your bathroom. We recommend selecting wall textures and colours which complement the style of your bathroom.

Choose your features

Our cabinets offer varying styles, sizes and features that allow you to choose a unit that meets all of your design requirements. Cabinet features range from adjustable glass shelves to demister pads, shaver sockets and integrated speakers.

Harlow

“Linear luminosity”

A fantastic addition to any bathroom, Harlow's dual strip design immediately demands your attention. Featuring an infra-red sensor to activate, a demister pad and a charger socket for convenience. A strip of additional lighting has been fitted underneath the cabinet providing additional task lighting. Available in 500mm and 600mm widths, the internal glass shelves can perfectly house all of your bathroom products.

Single door Harlow is 700 x 500 x 138mm.
Double door Harlow is 700 x 600 x 138mm.

LED CEILING & SHOWER LIGHTING

Ceiling lighting is the one element of a bathroom scene that is essential. We offer a range of spot lights which allow you to tailor a solution perfect for you.

Our tips and advice...

Style and size

Consider the overall style and size of the room to ensure you choose the best solution for your bathroom design.

Considerations

When selecting your ceiling spot light, consider the following:

- Do you want fire rated or non-fire rated fittings?
- What sort of finish do you want; chrome, glass or white?
- What colour temperature do you want; cool or warm white?

Safe and sound

All of our spot lights are IP-rated so you can be sure of their quality. We also ensure they are 240V which guarantees an easy installation

- IP44 rated. Suitable for use in zone 2 of the bathroom

OVER MIRROR & WALL LIGHTING

Our over mirror lighting range is specially designed to be positioned above a bathroom mirror or cabinet to offer additional light. These attractive fittings provide task lighting that makes those bathroom routines a little easier; a small detail that creates dramatic impact in your bathroom. Look out for our over mirror lights that feature COB LED technology which delivers the brightest light output and longest lifespan.

Our tips and advice...

Consider lighting positions

Positioning wall lights either side of your mirror reduces shadowing across the face; perfect for applying make-up or getting that precision shave just right.

Textures and colours

As with most lighting, consideration should always be given to how the light will contrast with the colours and materials used on your wall. If using dark tiled walls specify a fitting with a cool white option, conversely beige painted walls are more suited to a warm white finish.

Select a light that fits your mirror style

Choosing the right light to sit above your mirror can be crucial in the overall look and tone. A contemporary mirror can be made to look ultra-modern with the right accompanying mirror.

- The infinity fitting can be mounted horizontally or vertically
- Mount one at both sides of a vanity mirror to create a stunning feature
- IP44 rated. Suitable for use in zone 2 areas of the bathroom

LED CABINET LIGHTING

Illuminate your bathroom cabinets for the ultimate ease of use by introducing cabinet lighting. This is a beautiful extra that will bring a level of luxury to any bathroom design as well as making life a little easier; no more searching for bathroom products in the back of dark cabinets. Alternatively, they can be used as feature lighting to simply create atmosphere.

*Most batteries will need recharging every 5 months and should never be recharged in-situ.

Our tips and advice...

Retrofit

We realise that you may have already selected a piece of furniture for your bathroom that you love. Therefore we have developed a range of LED lights that can easily be retrofitted into your cabinets, look out for the "retrofit" icon to discover which of our products would be suitable in this case.

Rechargeable

We have designed all of our retrofit lights with lithium-ion batteries that can be recharged to make your life a little easier.

Become efficient

Many of our products are fitted with timed sensors that will turn the light off after it detects a period of inactivity. This way you can be confident you are not wasting power and energy if you accidentally leave your cabinet open.

LED MOOD LIGHTING

Inject tranquility and create an aura of relaxation by introducing mood lighting into your bathroom. This lighting offers a much softer, soothing level of light compared with the brightness of task lighting. If you have niches or alcoves in your bathroom illuminate them with an IP rated flexible strip. Alternatively, integrate plinth lights around the bath to create a relaxing ambience as well as a striking focal point. Mood lighting is also perfect for enhancing features to create a dramatic effect. Our range of mood lighting is all IP rated and can be used in all bathroom zones.

Our tips and advice...

It's all about looks

Clever mood lighting is where you capture the "wow". Get it right and you create a space bursting with character and atmosphere. If you want a room oozing in peace and tranquillity, this is how you achieve it.

Location

Consider where you place your new lights. Positioning lights nearer to the floor can create a floating effect. Lighting fitted around a cabinet provides a stunning framed effect if you want to accentuate a piece of furniture and really draw the eye to it.

Don't overlook it

Mood lighting is often the most overlooked aspect of a lighting scheme and yet it delivers the most impact on the overall appearance and tone.

PENDANT LIGHTING

Introducing pendant lighting into a bathroom is the ultimate style statement and is a great option if you have the space. No longer are pendants simply used in the kitchen or above dining tables. Our pendant lights are IP rated and therefore suitable for use in the bathroom and any other area in the home. Not only does a pendant light add visual sparkle to the bathroom but it also compliments other lighting within the room. Use a statement pendant like Bellatrix over a free standing bath to inject a real 'wow' factor. Or cluster together the Zirconia single pendants in the corner over a countertop or over the bath to add an elegant, on-trend designer edge to your bathroom.

Our tips and advice...

Create zones

Low hanging pendant lights can bring about a sense of identity to a room. They can be particularly effective in open plan spaces where they help create subconscious boundaries between spaces.

Up or down?

Pendant lights are designed to be flexible; you can adjust the heights so they sit higher or lower depending on your room layout. Alternatively, you could consider having a cluster of lights all hung at separate heights to create a truly unique lighting effect.

Focal point

Create a centre piece to your bathroom. A cluster of pendant lights or even a single Bellatrix can create a breathtaking and eye catching feature to any room.

on

off

SE32101W0 | ZIRCONIA

Zirconia

“A drop of style”

The Zirconia is a stunning example of style and function, creating an irresistible combination. Personalise your design by tailoring the height of the lights to suit your needs. Flexible in its design, Zirconia creates a dramatic effect when used in clusters but also stands-out when used on its own.

Please see **page 90** for technical details.

SE32001W0 | BELLATRIX

Bellatrix

“The ultimate statement”

What more can we say about Bellatrix? It is quite simply a stunning light which has a dimmable function to ensure you capture the right mood on every occasion. The Bellatrix also has integrated LEDs sitting above a beautiful crystal layer, creating a truly unique lighting effect – they have a lifespan of 30,000 hours, giving you complete peace of mind that this statement fixture will serve you well into the future.

Please see **page 90** for technical details.

PENDANT LIGHTING

Bathroom Zones

Using electrical equipment in bathrooms or wet rooms has always needed care to ensure safety. The IEE Wiring Regulations (17th Edition) have identified particular zones within the bathroom to indicate what type of electrical equipment can be installed.

Zones

0 Inside the bath or shower. Must have a minimum rating of IP67 and must be low voltage (12V max.)

1 225cm above the bath or shower. Minimum rating of IP44. If the fitting is 240V a 30ma RCD must also be used to protect the circuit in this zone.

2 The area stretching to 60cm outside the bath or shower and 60cm from water outlet of sink. An IP rating of at least IP44 is required.

IP Ratings

The IP (Ingress Protection) rating is a two digit code given to a piece of electrical apparatus that indicates the degree of protection its enclosure provides from dust, water and impact.

1st Digit Number	Protection Against Solid Objects	2nd Digit Number	Protection Against Liquids
0	No Protection	0	No Protection
1	Protected against a solid object greater than 50mm (e.g. a hand)	1	Protected against vertical falling drops of water e.g. condensation
2	Protected against solid objects over 12mm (e.g. fingers)	2	Protected against water drops at a 15 degree angle from the vertical
3	Protected against solid objects over 2.5mm (e.g. tools)	3	Protected against sprays to 60 degree angle from the vertical
4	Protected against solid objects over 1mm (e.g. wire)	4	Protected against sprays from any angle e.g. splashes of water
5	Limited ingress of dust permitted (no harmful deposit)	5	Protected against water jets from any direction
6	Totally protected against the ingress of dust	6	Protected against powerful water jets and heavy seas
		7	Protected against immersion in water (up to 30 mins between 15cm & 1m)
		8	Protected against long periods of immersion under pressure

IP65

OUTSIDE ZONES - Anywhere outside zones 0, 1 and 2, where water jets are not used for cleaning purposes, the general rules of BS7671 apply.

Social Media

You can keep up to date with all of the latest developments at Sensio by following us across social media.

We regularly keep our followers up to date with our latest product innovations, market trends and insights. If you are creating your first lighting plan or looking for lighting inspiration, our social activity could provide the answers.

Sensio Lighting Ltd

WEBSITE

Visit our website at www.sensio.co.uk for more information on our kitchen, bedroom and bathroom products. At Sensio, we fully believe that an effective lighting plan should be considered at the start of any bathroom project. Use our website to unlock some useful hints and tips on how to create a plan that fully fits your requirements. If it's technical guidance you are looking for, we have a number of "how-to" video demonstrations. Alternatively, discover more about Sensio, our pioneering spirit and how we are helping forge trends in the market.

You will also find relevant FAQ's and technical information on each product page. We want to give you all the information up front so you know exactly what you're committing to. If you're still unsure, please use the contact us page to send us an enquiry.

Commitment to Excellence

Here at Sensio, we have a very obsessive focus on delivering the best for our customers:

QUALITY THROUGHOUT

We pride ourselves on offering superior quality products, using the best components and materials to guarantee long-life performance, high light output and enhanced durability.

To reflect the high quality of our product portfolio, our bathroom products come complete with a 2 Year Guarantee for your peace of mind. We have also achieved ISO 9001: 2015 Quality Management Status, demonstrating our ability to meet both customer and applicable statutory and regulatory requirements.

DESIGN & INNOVATION

Design and development has always been at the heart of what we do. We don't just follow the trends - we help set them. We design and develop products in the UK, allowing us to put our expertise and industry knowledge to use, to ensure every detail is designed with sheer excellence and to the highest standard. Our extensive product range is constantly updated, enhanced and improved to ensure we stay at the forefront of our industry.

INSPIRATION

We don't just design lighting solutions, we make sure we understand our market. We research the latest trends, the latest technology and the latest fashion to ensure we deliver products that will stand the test of time.

Frequently Asked Questions

We understand that you may have questions so we have tried to cover as many as we can here. If you have a question that is not answered here, please visit our website for further assistance.

Where can I buy Sensio products?

You can purchase via one of our retailers. Details of your nearest Sensio retailer can be found using our online stockist list.

Where can I see Sensio products?

Most of our retailers have a selection of our products on display, we recommend calling for further details before travelling to avoid disappointment.

Do you offer free of charge delivery?

We offer free delivery, usually within 2 days (Monday to Friday), to UK Mainland destinations for all orders over £100 placed before 2pm. A charge of £8.95 for carriage and handling will be added to all orders of less than £100 (excluding VAT) for deliveries within the UK mainland only.

Channel Islands, Isle of Man, Scottish Highlands and Eire will incur a separate delivery charge, determined by the destination and weight of the total order. We do not offer delivery to any other international locations at this stage.

Do you offer a product guarantee?

We offer a 2 year guarantee across all of our bathroom products.

We hope you enjoy this Sensio brochure. When you've finished with it please pass it on to a friend or recycle it. Thank you.

The colours in this brochure are as accurate as the printing process will allow, and we recommend that you view a product prior to purchase. Errors and omissions excepted.

Do you only offer LED lighting products?

Yes. We fully believe LED is the only lighting solution for all bathroom requirements. Not only does it provide the same power output as other lighting options, it is also the most efficient. This efficiency results in less electricity being used, saving you money and helping the environment.
