Shade Variations

- in private and public areas
- for floors, walls, stairs and terraces
- robust and durable
- full-body colouring
- variety of designs
- various surface finishes
- various classes of slip resistance
- ideal for underfloor heating
- exact colour and design planning possible
- colour- and light-fast
- chemical-resistant
- resistant to stains and soiling
- frost-resistant

Vilbostone porcelain stoneware permits a wealth of different surface designs featuring unusual colour and sheen effects. Vilbostone porcelain stoneware is available both glazed and unglazed, with a matt, polished, rough-polished or relief surface finish and in various classes of slip resistance.

Vilbostone porcelain stoneware tiles are coloured throughout. Unglazed Vilbostone porcelain stoneware with a matt or rough-polished surface finish have the Vilbostoneplus seal, which renders the tiles particularly resistant to dirt and stains. During the manufacturing process, the structure of the tile surface is sealed in order to further increase the tiles' resistance to staining and dirt, as a result of which subsequent treatment with impregnating agents is no longer necessary. Unglazed Vilbostone is particularly suitable for heavily-used floors in public areas. It offers a high level of resistance to frost and chemicals and is colour and light-fast.

CERAMICPLUS

- Very easy to clean
- Dirt-repellent, less cleaning necessary
- environment-friendly, saves on cleaning agents
- water and a soft cloth are all that's needed, a mild cleaning agent is sufficient for more stubborn dirt
- resistance proven 10-year simulation to verify the material's durability,
- subject to compliance with the care instructions
- hygienic, poses no health or environmental risks

The easy-care Ceramicplus finish was developed in the Villeroy & Boch laboratories according to the latest findings from the field of materials research. Ceramicplus provides the ceramic surface with a permanent finish by means of a special process.

On nonvitreous wall tiles treated in this way, dirt particles are virtually unable to obtain a hold and flow off with water droplets. Water and a soft cloth are all that's needed for routine cleaning. Mild, environment-friendly cleaning agents are sufficient to remove more stubborn dirt – no need for aggressive detergents. The highly effective and sustained hygienic properties of Ceramicplus have been confirmed by means of extensive testing carried out at independent external testing institutes.
